

## Security & Productivity Apps for SafeStick

StickApps are a collection of Security and Productivity apps - some free and some licenced - which have been selected, designed and tested to work on SafeStick™ hardware encrypted USB memory drives.

Via SafeConsole, StickApps can be distributed automatically to all SafeStick users quickly and easily, giving instant productivity gains.

### stickapp anti-virus

Powered by: 

- The only on-access virus scanner which actively prevents viruses, worms and malware infecting your SafeSticks. Includes Keylogger protection.

### stickapp password manager

Powered by: 

- Total user identity management. One-click access and automatic logon to websites and applications, create very strong passwords and automate repetitive online form filling.

### stickapp vpn client

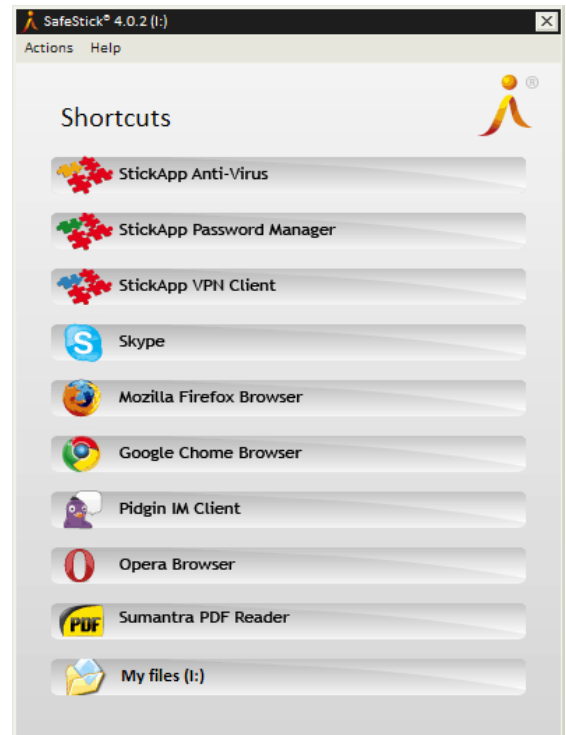

powered by: 

- Secure, authenticated remote VPN access to private networks.

### stickapp free

- Free productivity tools which run totally self-contained from SafeStick - including Skype, IM Client, PDF Reader, Word Processor, Spreadsheet application and selected web browsers.

## On-Access Anti-Virus, Malware & Key Logger Protection for SafeStick

StickApp Anti-Virus actively prevent viruses, worms and malware infecting your SafeStick no matter if the host PC has anti-virus installed or not.

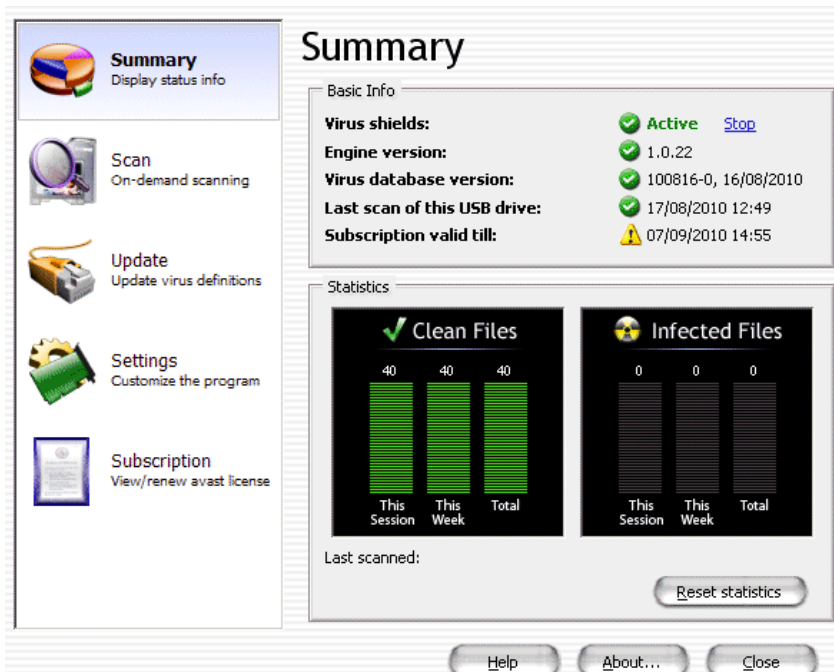

“Active Shields” are initialised every time a SafeStick is unlocked giving instant protection.

Scans of the host PC or any attached drive can also be manually initiated by the user - useful if using a SafeStick in an untrusted PC (such as a web cafe) where there is potential for keyloggers to steal user credentials and passwords.

StickApp Anti-Virus can be automatically installed onto all of an organisations SafeStick's via SafeConsole without any end user intervention.

### Key Features:

- Full on-access Virus, Worm, Spyware and Malware protection for SafeStick
- Key Logger protection
- Always-on Active Shields actively prevent infections
- Powered by Avast - one of the world leaders in anti-virus and anti-spyware technology
- Very fast start-up
- Scan the host for viruses automatically on startup
- Very fast scanning speed - independantly rated
- Independantly certified as a top performer in detecting viruses and malware
- Automatic, small, incremental database definition updates direct to SafeStick's
- On-demand scanning of files and folders and USB drives
- Simple, seamless, automatic deployment via SafeConsole
- Independantly tested and rated by Virus Bulletin, WestCoast Labs, ICSA and others.

### Technical Requirements

- SafeConsole v4.02+ Enforce and Enable Edition
- SafeStick or SafeStick SuperSonic v4.02+ firmware
- Windows 2000, XP, 2003, 2008, Vista, 7.
- 40Mb available space on SafeStick

### Licencing

- Priced per user, per year

## Password and Identity Management for SafeStick

Integrated automatically with Windows and many web browsers when SafeStick is unlocked, StickApp Password Manager completely automates logon to websites and applications. It also automates repetitive online form filling.

A very strong “Password Generator” enables users to replace insecure passwords with long, complex, strong passwords - which are hard to remember - but which Password Manager can store and retrieve with ease.

All personal data is totally secure and encrypted in TWO ways. Firstly in hardware by the SafeStick, then encrypted again by the application to AES 256bit military grade standards.

StickApp Password Manager can be automatically installed onto all of an organisations SafeStick’s via SafeConsole without any end user intervention.

\* An upgrade to a fully Active Directory Integrated Enterprise version - which brings true Single Sign On and Password Management to the Enterprise without any expensive customisation or integration - is also available.

### Key Features:

- **Fast, Easy Logins**

With just one-click from the Password Manager toolbar, you can automatically go to, and be logged into any favourite website or Application - there is no need to even open a browser or type the URL.

- **Fill Forms Fast - Save hours of needless repetitive typing!**

Use the Identities feature to securely store your name, address, email, phone numbers, credit cards - in fact any other personal information you choose to save and re-use.

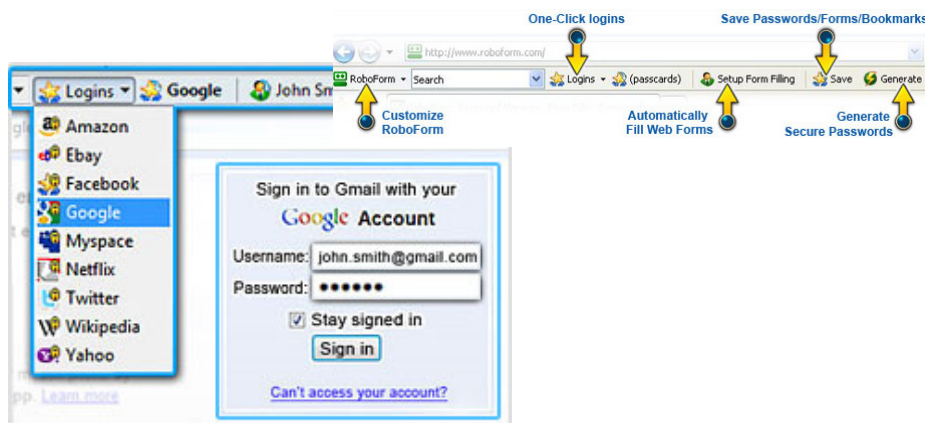

- **Strong Password Generator**

Strong passwords are essential for their logins to PayPal, Banking Websites and others. However strong passwords are just too hard to remember. With Password Generator this is no longer a problem. Select how strong you would like the password to be, click generate, and then Password Manager will store it securely for future use without you having to remember it!

- **Easy, Automatic deployment and very high user acceptance.**

- **Password Manager Toolbar integrates automatically to all your applications and web browsers - nothing to configure.**

- **Save notes and bookmarks, search the internet, and generate new passwords — all from one toolbar.**

### Technical Requirements

- SafeConsole v4.02+ Enforce and Enable Edition
- SafeStick or SafeStick SuperSonic v4.02+ firmware
- Windows 2000, XP, 2003, 2008, Vista, 7.
- 10Mb available space on SafeStick.

### Browser Support

- Internet Explorer and FireFox.

\*\* Other browsers are currently not supported as they generally require files to be installed on the host PC.

### Licencing

- Priced per user, per year

## Secure, Fast, Simple VPN Access to Corporate Networks

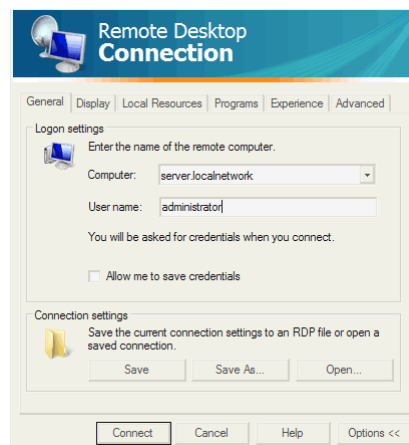

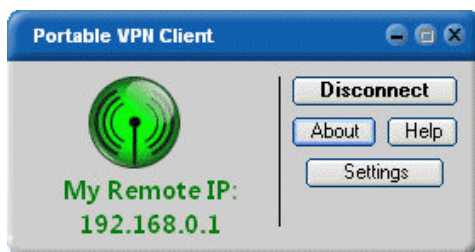

StickApp VPN Client enables secure, authenticated remote VPN access to private networks such as your office network or branches anywhere in the world.

As with all StickApps, VPN Client can be automatically “pushed” out onto all of your users SafeSticks via SafeConsole, and can be (optionally) initialised automatically every time a user unlocks their SafeStick.

Having your VPN client installed on a SafeStick makes VPN more secure than traditional PC based clients.

### Key Features:

- Secure VPN connection to your office/home from SafeStick
- Leaves no footprint or configuration on the computer
- Easy to centrally setup/configure for repeatable use
- VPN Settings can be completely hidden from users.
- VPN PPTP Technology - works with virtually all Firewalls
- No installation necessary on the host computer.
- As its stored on SafeStick, everything is encrypted in hardware
- Can auto-assign IP address and DNS settings
- Uses software compression and data encryption
- Can be configured to request an optional PIN number for even further security.

### Technical Requirements

- SafeConsole v4.02+ Enforce and Enable Edition
- SafeStick or SafeStick SuperSonic v4.02+ firmware
- Windows 2000, XP, 2003, 2008 Vista, 7.
- 4Mb available space on SafeStick.

### Licencing

- Priced per user, per year

## Free Productivity Tools for SafeStick

A range of free productivity tools are available which have been tested to work with SafeStick.

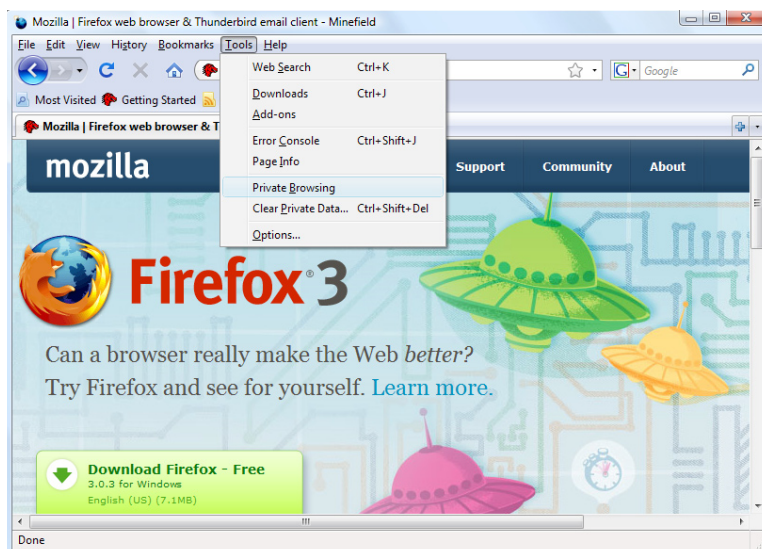

As with all StickApps, one or more of these useful apps can be automatically “pushed” out onto all of your users SafeSticks via SafeConsole, and can be (optionally) initialised automatically every time a user unlocks their SafeStick.

Why Publish a Free StickApp for your users? Convenience & productivity. Imagine all your SafeStick users being able to communicate with the office via Skype, or use a Secure Web browser without having to install anything on the host PC.

More productivity apps are being added all the time - if you have a specific need please let us know and we will try to accommodate you.

### Current Free StickApps :

- Skype
